Summer 2022

Welcome to Solution Not Pollution!

Thank you for following our unique climate change challenge project! And welcome to our fifth and final newsletter!

The Solution Not Pollution project has been running since February 2020, and May 2022 has marked the end of our youth climate action project. Don't worry though – all the resources that we have developed will be available for you to use for the next 5 years!

To access these materials, all you need to do is visit our project website:

www.solutionnotpollutionproject.eu

In this newsletter, we will provide you with an overview of some of the promotional activities we have been completing over the last 6 months to ensure that our Solution Not Pollution project has a lasting impact on youth climate education in our regions!

Solution Not Pollution – Mobility of Young People

Solution Not Pollution aims to support young people to develop their critical and creative thinking skills, and to develop solutions to some of the climate change challenges that we are facing.

To support young people from Germany, France, Czech Republic, and Ireland to form lasting partnerships to address climate change in their communities, all project partners sent two young people to Dresden from 11th to 15th April to test the Solution Not Pollution WebQuest activities and to generate their own solutions to the climate crisis.

During this week in Dresden, young people from Ireland, France, Germany, and Czech Republic participated in team activities, and generated their own ideas for how young people in their communities could support climate action!

Solution Not Pollution Final Conference in Ireland!

The Solution Not Pollution Final Conference was held in Belturbet Town Hall, in Belturbet, Cavan on Tuesday, 10th May 2022.

The Conference was opened by local politician, Brendan Smith TD, and keynote addresses were also delivered by Mr. Ross Boyd, the Vice President for the Union of Students Ireland, and Welfare and Sustainability Officer in Dublin City University; and by Mr. Darragh McAvinney, a spokesperson for the Zero Waste Belturbet project, which aimed to support young people in Belturbet to get a better understanding of what can be done in their community to reduce waste and tackle climate change.

Summer 2022

The Conference also gave staff from Future in Perspective the opportunity to present our educational products to young people, youth workers and teachers. The following materials were presented during the conference:

- The Training Programme for Youth Workers and Teachers (IO1)
- The Climate Change Challenge WebQuests (IO2)
- The Online and Social Entrepreneurship Curriculum for Young People (IO3)

The Conference was well attended by young people and teachers from St. Bricin's Secondary School in Belturbet. To engage these teachers and young people in coming up with their own solutions to the climate crisis, staff from Future in Perspective hosted an engaging and interactive workshop where the Solution Not Pollution WebQuests were tested by the young people!
